

# Dry Ice Blasting: Seasonal Plan

Chemical-free, non-abrasive cleaning for equipment, vehicles, and facilities.

## Q1 — Plan

- Inventory assets: production equipment, fleet, facility
- Set cleaning frequency by asset criticality
- Schedule shutdown windows with operations

## Q2 — Execute

- Pre-clean staging: cover sensitive components
- Blast at correct pellet size and pressure
- Capture residue / debris for proper disposal
- Document before/after for QA records

## Q3 — Maintain

- Mid-year rotation through fleet & equipment
- Spot-clean high-fouling assets

## Q4 — Review

- Annual report: assets cleaned, downtime saved
- Plan next-year scope & contract renewals
