

Dust Control: Seasonal Plan

Magnesium chloride & brine programs for unpaved roads, lots and job sites.

Spring

- Grade and shape road surface before first application
- Schedule initial mag chloride application as temps stabilize
- Survey traffic counts & dust complaint history

Summer

- Apply mag chloride at 0.3-0.5 gal/sy
- Re-apply mid-summer on high-traffic stretches
- Monitor humidity — product hygroscopic performance

Fall

- Optional late-season touch-up application
- Prep transition into snow & ice season

Winter

- Document residual performance
- Plan next year's application calendar
