

Line Striping & Pavement Marking: Seasonal Plan

Keep your lot ADA-compliant and easy to navigate year-round.

Spring

- Audit existing striping: faded lines, ADA stalls, fire lanes
- Photograph layout before sealcoat overlay
- Schedule re-stripe within 24-72 hr after sealcoat

Summer

- Apply traffic paint or thermoplastic in dry conditions
- Verify ADA dimensions & signage compliance
- Refresh handicap symbols, stop bars, arrows

Fall

- Touch-up high-wear areas (drive lanes, entrances)
- Re-paint curb markings (fire lane red, no-park yellow)

Winter

- Document plow / salt damage for spring
- Plan layout changes for next season
